

# DRYline® HP

High-perm, strong and drainage capable residential & light commercial building wrap when you need severe weather protection, more effective exterior wall insulation or a lower cost to insulate.

Engineered from strong non-woven fabric and high- performance weather barrier films that help save energy and move moisture vapor out fast. DRYline HP is a favorite of builders under all types of exterior cladding, when there is more heating than cooling days.

## Water Resistant

DRYline HP provides the highest real-world resistance to moisture while limiting air movement within the wall cavity.

## Air Barrier

DRYline HP is a recognized air barrier material that allows for the highest transfer of moisture vapor, creating a healthier and more energy-efficient structure for projects in wet and cold climates.

## Breathable

DRYLINE HP reduces the potential for condensation buildup and is tailored for projects requiring higher levels of vapor permeability.

## UV Stable

DRYline HP has a 50% longer UV exposure rating than other building wrap brands, and may be left exposed for up to 180 days.

## Meets US Building Codes

DRYline HP is rated for commercial projects and offers excellent performance in residential applications. It meets or exceeds applicable building codes for water-resistant barriers and air barriers, creating a healthier, more energy-efficient building.

## Broadcast Custom Printing

Turn your building into a billboard with BROADCAST custom printing! A full range of vivid colors are at your disposal to print multiple, alternating messages and images on your building wrap. BROADCAST custom printed advertising also features the industry's largest print area and lowest minimum order quantity.

## Strength

DRYline HP is almost twice as strong as the industry leader, and will stay fastened for longer.

## Energy Efficiency

DRYline HP is recognized as an air barrier material, which qualifies it as an “Eligible Building Envelope Component” under section 25C of the American Recovery and Reinvestment Tax Act of 2009. It also qualifies its user for a Federal Tax Credit.

## Simple Application

Lightweight yet durable, DRYline HP is translucent which makes locating studs, openings, and corners quick and easy.
